Warp Drive inc.

Dear Warp Drive Propeller Owner,

Congratulations on purchasing the best prop on the planet! We have made every effort to ensure that the useful life of your Warp Drive propeller will be as long as possible. Warp Drive propellers are built with our own unique process, aerospace certified materials and strict quality control. Your Warp Drive propeller will take much more use and abuse than any other propeller on the market due to its solid carbon fiber composite construction and ease of reparability.

This Warp Drive propeller comes with a Lifetime Satisfaction Guarantee. We will strive to ensure your satisfaction with your propeller for as long as you own it. This means that if you are not satisfied with the quality or performance of your prop, we will make every effort to correct the problem at any time. Please be prepared to supply us with performance numbers and pitch settings so we can determine what changes are necessary to correct the problem. PLEASE NOTE: This guarantee covers the quality of construction and the performance of your Warp Drive propeller. It DOES NOT cover the cost of repair or replacement of parts damaged due to the use, abuse, or accidents, nor does it cover the cost of replacing out of production parts.

Due to the fact that propellers are built to order, there will be a restocking and/or refinishing fee that will be deducted if a propeller is being sent back for a refund. This fee varies from \$100.00 and up depending on the blade and hub type. If we are not able to supply a propeller that suits your needs, we will issue you a refund of the purchase price of the propeller itself less the restocking and/or refinishing fee.

At the bottom of this page is a warranty registration form. We need to know who you are. Many propellers are sold through manufacturers or dealers so our records will not show the end user. Your Warp Drive propeller is identified by its own individual serial number. This serial number will give us all the necessary information to supply replacement blades or parts in the future. It will also give us an entire history of when the prop was originally sold, who it was sold to and what application it was built for. These serial numbers MUST NOT BE MIXED OR INTERCHANGED. You must not substitute a damaged or broken blade with another blade from a different serial number. The weights and balances must be matched for a replacement blade. Any warranty will be void if this has occurred.

Please fill out the WARRANTY REGISTRATION FORM and return it to us either by mail, fax or email to the address on this page. This will ensure that we have you on file with the propeller serial number, what you are putting the propeller on and all contact information so we can keep our records complete.

Best Regards,
Warp Drive Inc
